

Do not restrict XM's Satellite Radio's ability to provide me with new content! I love the stations on XM that provide local traffic and weather and I do not want them removed. Honestly, I prefer XM to broadcast because it is less amateurish, provides me with a broader variety of talk, and other things I can't get on broadcast like old radio, books read to me, etc. It is like the first time I saw cable TV, it filled in a void that ABC, CBS and NBC just weren't doing for me.

Please support the continued growth of satellite radio so I can choose what I wish to hear!!
